## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 1-25 are allowed.
2. The following is an examiner's statement of reasons for allowance: Prior art fails to show, a Operating apparatus having a drive element, a stationary frame which rotatably supports the drive element about a rotation axis and a vibrating element abutting on the contacted element at a single point. Prior art also fails to show, the vibrating element fixedly provided on the frame; so that the extension and contraction direction of the vibrating element is substantially perpendicular to the rotation axis of the drive element when the vibrating element is driven, the vibrating element transmit power to the driven element via the contacted element at the single abutting point to rotate the driven element with respect to the frame. Prior art also fails to show, a contact element to rotate the first frame. Prior art also fails to show, the vibrating element transmitting power to the driven element via the first contact element to rotate the driven element with respect to the first frame; and the second vibrating element transmitting power to the first frame via the second contact element to rotate the first frame with respect to the second frame.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
